

Belnifrem® (cytisinicline)

Overview

Belnifrem® is a prescription-only medication indicated for smoking cessation and reduction of nicotine cravings in smokers who are willing to stop smoking.

One pack of Belnifrem® contains 100 tablets, which is a complete 25-day treatment course. Belnifrem® is provided with colour-coded instructions on the blister pack which can help individuals with both dose timings and tracking progress.

Further information for healthcare professionals, including adverse event reporting and prescribing information for Belnifrem® can be accessed using the link below.
