

I would like to take an NCSCT again for recertification.

We now allow re-takes of course assessments so that users registered with the NCSCT can regularly refresh their competencies and have a dated certificate as proof of this. We suggest:

- The Very Brief Advice on Smoking (VBA+) training course should be retaken yearly;
- The Practitioner Training Course should be retaken every five years, but ideally every three years.

You can retake any assessment by logging into your NCSCT account and navigating to the assessment you wish to retake within the [e-learning portal](#).
